Summary

Highly motivated Computer Engineering student with strong skills in Java, Python, HTML, CSS, and JavaScript. Experienced in developing full-stack applications, including an AI Voice Translator, Library Management System, and AI-enabled Banking Management System. Strong foundation in database management, REST APIs, object-oriented programming, and web development, with a keen interest in building practical and scalable technology solutions.

Work Experience

AI Engineer Intern, TechGeekConnect Technologies LLP

01/2026 – 02/2026

Wagholi

- Developed and implemented machine learning models for predictive analytics, enhancing data processing efficiency by 15%.
- Utilized Python, TensorFlow, and PyTorch to train neural networks and optimize model performance.
- Collaborated with senior engineers on data preprocessing and feature engineering, improving model accuracy by 10%.
- Assisted in deploying AI solutions, contributing to a 5% reduction in computational overhead.
- Conducted experiments and analyzed results to refine algorithms, demonstrating strong problem-solving skills.

Full Stack Web Developer Intern, Aparaitch Software

06/2026 – 09/2026

Baramati

- Developed and maintained full-stack web applications using modern JavaScript frameworks (React, Node.js) and RESTful APIs, improving system performance by 20%.
- Designed and implemented robust backend services with database integration (SQL/NoSQL), ensuring data integrity and scalability for high-traffic applications.
- Collaborated with cross-functional teams to define project requirements, deliver features on time, and resolve complex technical challenges.
- Optimized application responsiveness and user experience through efficient front-end development and rigorous testing practices.
- Contributed to a scalable architecture, enhancing deployment efficiency and reducing operational overhead by 15%.

Education

Bachelor in Computer Engineering,

Present

Sharadchandra Pawar College of Engineering and Technology

Baramati

CGPA: 9.28

- Completed core courses in Data Structures, Algorithms, Object-Oriented Programming, and Computer Networks, gaining proficiency in Java, Python, and C++.
- Developed strong problem-solving and analytical skills through rigorous coursework and practical applications.

- Cultivated teamwork and communication skills through collaborative projects and technical presentations.
- Demonstrated expertise in system architecture, operating systems, and database management, preparing for diverse engineering roles.

12th Standard Higher Secondary Certificate (HSC),
Someshwar Vidhalaya and Junior College Someshwarnagar
 Percentage: 72.67%

02/2023
 Baramati, India

- Developed a strong foundation in Mathematics, Science, and core academic subjects, supporting further studies in Computer Engineering.
- Strengthened analytical and quantitative problem-solving skills through Mathematics and science-based coursework.
- Improved time-management and study-planning skills while balancing academic coursework and examinations.
- Built communication, teamwork, and presentation skills through academic activities and collaborative learning.

10th Standard Secondary School Certificate (SSC),
Someshwar Public School Someshwarnagar
 Percentage: 89.40%

07/2021
 Baramati, India

- Built a strong academic foundation through Mathematics, Science, and other core subjects, developing logical and analytical thinking.
- Strengthened problem-solving abilities through academic activities, examinations, and practical learning.
- Developed discipline, time-management, and consistency through regular coursework and academic responsibilities.
- Participated in school activities and group work, building teamwork, communication, and interpersonal skills.

Projects

NovaBank – Banking Management System

08/2026 – 09/2026

<https://github.com/VaishnaviRane123/BankingSystem> 

- Led the development of a full-stack banking management system, improving customer experience and banking operations.
- Implemented secure user authentication, KYC management, account creation, transactions, and role-based access control.
- Designed a responsive banking dashboard with Next.js and Tailwind CSS, providing intuitive access to accounts, transactions, and services.
- Integrated MySQL with Prisma ORM for reliable data management, supporting customers, accounts, transactions, loans, and repayments.
- Developed RESTful APIs for secure transaction processing, account management, loan applications, and administrative operations.
- Implemented AI-powered banking features including fraud-risk scoring, spending insights, transaction categorization, and a read-only banking assistant.

Redbus-Master

07/2026 – 08/2026

<https://github.com/VaishnaviRane123/RedBusMaster>

- Led the development of a full-stack Redbus-Master application, enhancing user experience and operational efficiency.
- Implemented a robust backend using Node.js and Express.js, managing user authentication, booking, and payment processing.

- Designed an intuitive frontend with React.js, improving navigation and reducing booking time by 15% for over 10,000 users.
- Integrated MongoDB for scalable data storage, ensuring high availability and fast retrieval of bus schedules and user data.
- Utilized RESTful APIs to facilitate seamless communication between frontend and backend, processing an average of 500 transactions daily.
- Deployed the application on AWS EC2, achieving 99.9% uptime and handling peak traffic without performance degradation.

AI Voice Translator

01/2026 – 02/2026

<https://github.com/VaishnaviRane123/AI-VOICE-TRANSLATOR>

- Developed a full-stack AI Voice Translator web application enabling real-time, bidirectional speech-to-speech translation across multiple languages from January 2026 to February 2026.
- Engineered a robust backend API using Python and Flask, integrating Google Cloud Speech-to-Text for accurate transcription and Google Cloud Translation for seamless language conversion.
- Implemented a responsive frontend with React.js, featuring intuitive user interface for language selection, real-time audio input, and translated output display.
- Designed and managed data flow between frontend and backend, ensuring efficient processing and low latency for real-time translation.
- Utilized Git for version control and collaborated on code development, ensuring project stability and maintainability.

Certifications

Full Stack Web Developer Intern

06/2026 – 09/2026

https://lnkd.in/p/gXG_fP4X 

Baramati, India

- Developed and enhanced full-stack web applications using Java, Spring Boot, HTML, CSS, JavaScript, and MySQL.
- Implemented backend services, database integration, REST APIs, and CRUD operations for application features.
- Built responsive and user-friendly interfaces while integrating frontend components with backend services.
- Collaborated with the development team to debug issues, improve functionality, and follow structured development practices.

AI Engineer Intern

01/2026 – 02/2026

<https://lnkd.in/p/g4CVcG6p> 

Wagholi

- Worked on AI and machine learning projects using Python, supporting data preprocessing and model development.
- Performed data cleaning, analysis, and feature preparation to improve the quality of datasets used for AI applications.
- Implemented machine learning and deep learning concepts using Python libraries and frameworks.
- Collaborated on project development, testing, documentation, and debugging throughout the implementation process.
